SOLKING WHITE PAPER

INTRODUCTION

SolKing was born as an innovative meme coin based on the Solana blockchain with the goal of evolving. It was launched with the intent of redefining the concept of meme coins and taking them to new heights. The objective is to transform SolKing into a utility token through implementations that will be introduced progressively, based on the project's growth and community needs.

SolKing is not just a crypto project but also one with significant potential for growth and mass adoption. Our goal is to build a strong, active, and engaged community that supports the project towards a prosperous and sustainable future.

Our motto is simple yet powerful: "Start from the bottom to rise to the top." With the community's support and continuous commitment, we aim to make SolKing a true force in the crypto space.

"From meme to King: born, growing, and here to stay – this is SolKing!"

VISION

SolKing is not just a multisectoral and multidisciplinary project; it is also a movement of thought founded on unity, sharing, and true decentralization. Our vision goes beyond the simple concept of cryptocurrency: we aim to build a strong community where every individual has a voice and can contribute to the project's future.

Our goal is to create an ecosystem where no one is left behind. In SolKing, wealth is not measured by the number of tokens owned but by the ability to support, share, and build together. The community will be the real driving force, controlling between 71% and 90% of the total supply (to be defined before launch). This distribution ensures the complete absence of rug pulls, as the conditions for one simply do not exist, making SolKing a transparent and highly decentralized project.

The remaining supply will be allocated among creators, developers, investors, marketing, merchandising, web designers, research and development, and all other essential professionals necessary for the creation, improvement, and promotion of SolKing.

DISTRIBUTION

The SolKing token distribution structure has been designed to ensure fairness and long-term sustainability. Currently, between 71% and 90% of the total supply will be held by the community, while the remaining percentage will be allocated to the team. However, this allocation is not exclusively for team members but is strategically divided to cover

essential aspects of project development, including marketing, investors, strategic partnerships, technological development, and expansion initiatives.

LOCKUP

Given the structure outlined above, there is no necessity for implementing the following lockup mechanisms:

Vesting Period → Gradual release of tokens over time.

Cliff Period → An initial period during which tokens remain fully locked before vesting begins.

Liquidity Lock → Locking liquidity on DEX to ensure market stability.

Reasons for Lockup Exclusion:

Low Team Holdings

– No team member holds a significant amount of tokens that could influence the market or compromise the stability of the project.

Strategic Allocation

– A significant portion of the team's allocation is reserved for investments in growth, promotion, and development, ensuring that SolKing can progress and reach its full potential.

Project Sustainability

– The need for funds dedicated to marketing and development is essential for SolKing to expand and establish itself as a successful project. Overly restricting token availability to the team could hinder growth and adoption.

Community-Centric Approach

– The fact that 71% to 90% of the total supply is held by the community demonstrates SolKing's commitment to building a decentralized ecosystem, where value and decision-making power lie primarily with the users rather than the team.

SolKing aims to reach its full potential, consolidating itself as an innovative and long-lasting project. To achieve this, it is crucial to balance fairness in token distribution with the availability of resources for ongoing growth and development, while constantly seeking qualified professionals to contribute to the project's success.

Priority to Community Members

The selection of key figures necessary for SolKing's development, enhancement, and expansion will prioritize members of the community. Particular consideration will be given to those who, through their dedication, consistency, and perseverance, have actively contributed to spreading SolKing's mission, vision, and objectives.

Moreover, community members who distinguish themselves through commitment, consistency, and active contributions to SolKing's growth will receive a special recognition in the form of a custom tag within the official Telegram group (https://t.me/solking_official).

This recognition holds meritocratic value and serves as a token of gratitude for their contributions to the project. Given that many community members work in the crypto, web, and related fields, this tag can act as a certified skill on their resume, proving their active role and experience within the SolKing community.

A Growing Recognition

With SolKing's success, the value of this recognition will increase, becoming a significant testament to the dedication and trust earned within an expanding ecosystem.

In the future, after a thorough and prolonged evaluation of their contributions, the most deserving members will receive a unique NFT linked to their awarded tag.

This NFT will serve as a blockchain-certified proof of their status within SolKing, making the recognition official, transparent, and permanently recorded over time.

A Commitment to Those Who Contribute Selflessly

SolKing will always express recognition and gratitude toward those who contribute out of passion and community spirit, rather than for financial gain.

SolKing: More Than a Project, a Movement

SolKing is not just a project; it is a movement of ideas, a mindset, and a collection of initiatives aimed at the well-being of the community. Its strength lies in the people who support and nurture it every day.

We are here to be born, grow, and stay. Our success will not be purely financial but human, as every contribution from the community will be recognized and valued. Any future roles or collaborations will first be offered to those who have believed in and supported SolKing from the very beginning.

Together, we will transform SolKing into something unique, lasting, and glorious.

Another key aspect of SolKing's vision is clear and ambitious: to elevate a simple meme coin into a solid pillar of the crypto ecosystem, offering real and lasting benefits to all token holders.

Our primary goal is to drive the growth of $SKING's value to reach and surpass $0.10 within 12 months. However, our commitment goes beyond just price appreciation: every initiative, update, and partnership will be strategically designed to bring direct or indirect benefits to token holders.

Anti-Whale Persuasive Systems – Adoption of 1P1V Governance

Unlike traditional on-chain governance models, where voting power is proportional to the number of tokens held (plutocratic governance), SolKing adopts the "One Person, One Vote" (1P1V) system.

This approach ensures that every community member has only one vote, regardless of the amount of $SKING they hold. The 1P1V system effectively prevents vote manipulation and will remain intact even with potential technical advancements in SolKing.

Addressing the 1P1V Model Concerns

One common objection to the 1P1V model is that whales might attempt to create multiple wallets to gain extra votes. However, this strategy is impractical and inefficient for several reasons:

Complex Management: Creating and managing multiple wallets requires significant time and resources, including the transfer of tokens to each address.

Identity Verification: If the system integrates authentication methods (e.g., Telegram, X, NFTs, Soulbound tokens, or hardware wallets), each additional account would need separate verification, making the process even more cumbersome.

Voting on Social Platforms: Governance votes will also take place on official social platforms such as Telegram, X, and others, where manipulation is much harder. Creating and verifying dozens or hundreds of fake accounts just to sway voting results would be time-consuming, tedious, and easily detected.

By implementing these measures, SolKing ensures a fair and decentralized governance system, free from whale manipulation, where every community member has equal influence in shaping the project's future.

The Token System Only Benefits Whales

In the traditional governance model based on token holdings, whales can easily buy control of a project without effort. This often leads to decisions driven by personal interests rather than the well-being of the community.

The 1P1V system democratizes the decision-making process, preventing power from being concentrated in the hands of a few large investors and ensuring that every voice carries the same weight.

1P1V Promotes a Fair, Resilient, and Decentralized Ecosystem

Assigning one vote per person encourages decision-making based on ideas rather than capital. This approach:

Gives small holders an active role in project decisions, granting them the same decision-making power as large holders.

Creates a more inclusive and sustainable ecosystem in the long run.

Makes SolKing more resistant to manipulation and less dependent on large investors.

Encourages active community participation across multiple platforms, strengthening the project's identity.

Exclusion from Benefits for Harmful Behavior

SolKing is a community-driven project, built on a meritocratic system that rewards active participation and long-term support. However, to ensure ecosystem stability and protect token value, addresses that engage in massive and destabilizing sell-offs will lose access to the benefits reserved for the community.

Community Protection and Active Reporting

The SolKing community is vigilant, engaged, and does not tolerate those who try to exploit the project. Suspicious movements or large-scale liquidations that indicate a clear intent to destabilize can be reported directly by community members.

Implementation of a Monitoring Bot

To ensure maximum transparency and constant oversight, a monitoring bot will be implemented to detect and report suspicious whale sell-offs in real time.

This system will keep the community informed about large holder movements, allowing members to take action through reports and measures against addresses deemed harmful.

Tracking and Permanent Bans

Addresses identified as responsible for destabilizing actions will not only lose community benefits but will also be monitored for fund transfers to other walletsIf a banned wallet transfers tokens to another address, the new wallet will also be automatically excluded from all benefits.

The ban is permanent for all wallets linked to the same whale, regardless of evasion attempts.

Consequences for Identified Addresses

Addresses responsible for aggressive dumping or other harmful actions will be excluded from all future benefits reserved for SolKing members, including:

Access to rewards, exclusive events, and other perks.

Participation in key governance decisions.

Eligibility to receive exclusive NFTs for the most active and dedicated members.

SolKing Rewards Loyalty, Dedication, and Genuine Support

Anyone who chooses to speculate or harm the community or SolKing itself will be permanently excluded from all future advantages, with no possibility of reinstatement.

Security Audit for SolKing

SolKing is committed to ensuring transparency and security, subjecting its smart contract to independent audits by specialized firms.

Audit Objectives:

Ensure the accuracy of governance and tokenomics and other activities required by the certifying body.

Strengthen trust among the community and investors.

Procedure:

Audit firm selection will be conducted through a community poll, allowing members to choose the certifying body for maximum transparency and trust.

Publication of audit results for full transparency.

Benefits:

increased community trust and enhanced project reputation.

SolKing ensures democratic and community-driven decision-making by involving holders in the audit selection process.

Growth Strategies and Community Empowerment

SolKing's security and fairness measures align with strategies designed to foster active participation and enhance the project's value over time, establishing itself as a key player in the industry.

How will we achieve this?

By developing a multi-sector and multidisciplinary ecosystem, designed to drive SolKing's success and provide long-term benefits for holders, through the following initiatives:

Burn Day: A New Way to Support SolKing

Burn Day is a unique event, designed to make $SKING a deflationary asset while actively engaging the community in the project's growth. During this event, members will have the opportunity to voluntarily burn tokens, reducing the total supply and increasing the value of the remaining $SKING tokens.

How Does Burn Day Work?

Recurring Event: Burn Day will be held at regular intervals throughout the year, with each event announced in advance on our official channels.

Voluntary Burn: Users can send any amount of $SKING to the designated burn wallet.

How Does the Burn Work on Solana?

Tokens are sent to the 11111111111111111111111111111111 address.

These tokens become unrecoverable, as no one has access to that wallet.

The transaction is visible on-chain, ensuring full transparency.

Possible Surprises: While no guaranteed rewards are planned, special surprises might be offered in certain Burn Day editions for active participants.

End-of-Year Special Reward

At the end of each year, the wallet that burns the most tokens in a single transaction will receive an exclusive prize:

A rare NFT titled "Burn Master of SolKing"

This NFT will be unique and serve as the highest recognition for those who demonstrate the greatest dedication to the project.

Why Participate?

Reduce $SKING's total supply, increasing its value for all holders.

Strengthen community engagement and unity.

Gain access to exclusive rewards and surprises throughout the year.

Burn Day is not just an economic event, but also a symbolic moment of community strength and commitment.

NFT Collections: Art, Exclusivity, and Rewards for Holders

SolKing will introduce exclusive NFT collections to expand its presence in the NFT space.

Collection Categories:

Royal: NFTs linked to unique events and special partnerships.

Epic: Limited, rare NFTs with significant aesthetic and symbolic value.

Common: Accessible to all, yet still meaningful within the SolKing ecosystem.

Other Categories: New NFT types will be introduced based on community preferences and market trends.

Utilization of NFT Proceeds

Funds collected from NFT sales will be used for:

Incentives and rewards for $SKING holders.

Exclusive events and initiatives for the community.

Expanding the SolKing ecosystem with new features and partnerships.

Collaboration & Community Involvement

Community members will have the opportunity to submit creative content to be transformed into official SolKing NFTs.

Creators will receive royalties from NFT sales, encouraging active participation and strengthening the sense of belonging.

Future Opportunities: If the project succeeds, new collaborations and roles will be offered first to our community members.

Our Goal:

SolKing aims to become not just an innovative project, but also a real career opportunity for those who believe in our vision.

In SolKing, community growth will always be at the heart of every decision.

SolKing Gamification: The Digital Kingdom That Rewards Your Loyalty!

In the future, get ready to enter the majestic realm of SolKing, where every token holder is not just an investor but a true digital noble with their own medieval estate and the noble title they deserve!

How Does It Work?

Based on the amount of $SKING you hold, each member will receive:

A Medieval Estate – From the most luxurious castle to the humblest plot, every holder will have their own space within the SolKing kingdom.

An Exclusive Noble Title – From the wealthiest Count to the most modest Beggar, everyone will have a unique status. Even those with fewer tokens will have their place of honor in the kingdom!

Build Your Empire!

Want to upgrade your estate and climb the noble ranks? You'll be able to purchase Realm Tokens using $SKING! These tokens will allow you to:

Hire blacksmiths, carpenters, and artists to enhance your estate.

Order unique, customized items to stand out among the kingdom's nobles.

Expand and improve your property, increasing your status in the community.

Why Is This Beneficial for Everyone?

This system will not only make SolKing more engaging for gaming enthusiasts and collectors, but it will also increase the demand for $SKING, creating buying pressure that benefits all holders.

Exclusive Rewards

The revenue generated from gamification will be used to:

Reward the most loyal holders with extraordinary prizes.

Incentivize community growth.

Fund future developments and keep the kingdom expanding.

Moreover, if the gamified platform gains widespread adoption, we will consider developing a dedicated app available in official stores. This would not only enhance accessibility and user experience but also allow fiat currency transactions, with the revenue converted into SolKing, further boosting demand and strengthening the ecosystem.

A Kingdom for Everyone

Whether you're a king, a knight, or a humble beggar, SolKing ensures that every participant has value. Here, we never forget where we started—even the smallest holder plays a crucial role in this epic adventure!

The Realm of Opportunities: A Beacon for Emerging Projects

If the community supports this vision, SolKing will become a true reference point for emerging projects seeking visibility, support, and a strong community. We believe in the power of innovation and want to help promising projects grow while creating value for our $SKING holders.

How Does SolKing's Support Work?

Emerging projects can apply for SolKing's support through a structured selection process, which includes:

Application: The project team must submit an official request to SolKing, explaining their vision, utility, and goals.

Analysis & Evaluation: SolKing, along with the community, will review the project to assess its quality, transparency, and growth potential.

Community Voting: $SKING holders will have a say in selecting which projects to support, reinforcing the importance of community participation.

Acceptance & Partnership: If the project passes the evaluation, it will become part of the SolKing ecosystem, gaining access to visibility, marketing, and strategic support.

Benefits for $SKING Holders

Each supported project must provide tangible benefits to the SolKing community, such as:

Exclusive Airdrops – $SKING holders will receive airdrops from the new projects.

Special Rewards – Early access, exclusive NFTs, or other bonuses from the emerging project will also be available to SolKing's community.

Ecosystem Expansion – The more quality projects join, the more SolKing becomes a leading name in the crypto world.

Lastly, as a thank you to SolKing, the accepted projects will voluntarily send a chosen amount of $SKING to the dedicated burn address.

Goal: Building a Successful Ecosystem

Our mission is to make SolKing a go-to platform for launching innovative projects. This system benefits not only the new projects but also empowers $SOLKING holders to play a key role in the growth of the entire ecosystem.

Realm of Opportunities – The Community at the Heart of the Future

Since its inception, the SolKing community has been the driving force behind the project. One of our core goals is to ensure that our most active and loyal members continue to receive growing opportunities within and beyond the SolKing ecosystem.

For this reason, if the project continues to develop successfully, we will create a dedicated section on the official website reserved for professionals who have collaborated with SolKing. Their profiles will be showcased, allowing emerging projects and other interested parties to connect with verified and trusted professionals.

An Exclusive Network for True Builders

Throughout its expansion, SolKing has worked with numerous skilled professionals from the community. As a result, we will prioritize visibility for those who:

Have actively contributed to the project with skill, dedication, and quality.

Have supported SolKing with genuine initiative, prioritizing the growth of the project and its community.

Have achieved great results even without immediate financial gain, demonstrating passion and long-term vision.

While every contribution is valuable, SolKing especially recognizes those who have shown spontaneous dedication, creativity, and teamwork—providing value to the project beyond just financial incentives.

A Way to Thank the Community

This initiative is another way SolKing gives back to its community, offering the most dedicated members an exclusive platform to showcase their skills and career opportunities.

Through this platform, verified professionals within the SolKing ecosystem can:

Offer their services.

Connect with other project members.

Create new synergies, further strengthening the bond between SolKing and its community.

SolKing isn't just a project—it's an opportunity for those who build the future of the Kingdom with us!

Merchandising: SolKing Becomes a Style Icon!

SolKing, a true fashion brand! Our goal is to take the SolKing name and logo beyond the crypto world, transforming it into a style icon through an exclusive clothing and accessories line.

From t-shirts to hoodies, from caps to unique accessories, each item will be a symbol of belonging to an elite group of innovators who believe in the power of community and the future of cryptocurrencies. Community members will have a say in product choices.

But that's not all! A portion of the revenue will go towards:

Burn Day – Reducing the total supply, making SolKing even rarer and more valuable, with the goal of making it the most deflationary token possible!

Holder Rewards – Through special social initiatives, we will reward our loyal community with exclusive gifts and token rewards.

With this initiative, we will take SolKing to the next level, pushing it towards unprecedented heights.

Wear the future, support the King, and join the legend!

Charity Section: Giving Back with Heart

In a world where success often makes us forget our roots, SolKing remains committed to what truly matters—solidarity, compassion, and community spirit. Once we achieve our

primary goals (and perhaps even sooner), we will launch a dedicated charity mission to help those in need.

The Community Will Lead the Way – Members will be able to suggest worthy causes or charities for us to support. Every donation will embody our motto: "Starting from the bottom to rise to the top."

More Than Just Generosity – This isn't just about donations; it's a commitment to remembering where we came from and extending a helping hand to those in need.

If you can give, you will. And together, we will show that true wealth isn't just about numbers—it's about changing the world, one act of kindness at a time.

Road Map?...no, SolKing Map! – The Road to the Throne!

From 1-4 months: Foundations and Development

Official Launch of SolKing: Creation of the website, whitepaper, and presence on major social media platforms.

Community Building: Launch of the Telegram channel and group, community engagement, AMAs, events, and collaborations with influencers and industry specialists.

Audit and Security: Conducting audits on the project to ensure security and reliability.

First Burn and Listing on Minor DEXs.

From 3-12 months: Expansion and Partnerships

Strategic Partnerships: Collaborations with other crypto projects or crypto influencers to expand SolKing's visibility and increase its utility.

Marketing and Promotion: Launch of advertising campaigns on social media and partnerships with mid-tier and high-profile influencers.

Launch of the SolKing NFT Collection: Introduction of exclusive NFTs linked to the project to attract new users and strengthen community loyalty.

From 8-24 months: Consolidation and Listings

Listings on Centralized Exchanges (CEXs): Active pursuit of listings on cryptocurrency exchange platforms.

Technical Updates and Improvements.

Events – In-Person and Virtual: Participation in and organization of events to expand SolKing's recognition in the crypto world.

Growth and Strengthening: Launch of new utilities.

From 12-30 months: Global Expansion

Increased Global Presence: Expanding SolKing's presence in new regions with targeted campaigns in Asia, Europe, and Latin America.

Future Roadmap: Publication of a new SolKing Map with more ambitious goals, such as listings on major global exchanges and expanding the network of partnerships.

Technology & Security

From Day 1 and Forever in the SolKing Realm…

A Website Created by the Community, for the Community

SolKing will launch its website as soon as possible in an intentionally basic version—not due to a lack of resources or ideas, but as a strategic choice. The site will be a dynamic project in continuous evolution, built directly by the community through their suggestions and ideas. It won't just be an informative, gaming, and representative portal but a platform shaped by users themselves. Every update and improvement will reflect the needs and expectations of the community.

This way, SolKing empowers its members, transforming them into the real builders of the project.

Recognition for Contributors

Community members who, driven by team spirit and without profit motives, make significant improvements to the website or contribute substantially to SolKing's development and promotion will receive special recognition within the official Telegram group. These members will be assigned a personalized tag with a title reflecting their contributions.

This won't just be a token of gratitude but also an official acknowledgment that can be used as a certified skill on their resume.

Exclusive NFT as On-Chain Certification

Beyond the Telegram tag, outstanding contributors will receive a special, unique NFT linked to their contribution. This NFT will serve as immutable proof on the blockchain of their status and work within the SolKing ecosystem.

This is not just decentralization—it's active participation. The website will be by the community and for the community, making it unique and fully aligned with SolKing's philosophy.

SolKing Festival: The Gathering of the Sun

Once a year, the community will come together for a special event, decided and shaped directly by the members of the kingdom. During the festival, there will be activities, rewards, and celebrations for all participants.

Gateway and Random Prizes – SolKing will distribute tokens, exclusive NFTs, and other rewards to randomly selected participants.

Themed Competitions – Creative mini-contests like fan-art creation, memes, videos, or SolKing history quizzes, with prizes for the best submissions.

Surprise Events – Exclusive announcements, new features, future developments, and special reveals for the community.

The Grand Burn Ceremony – A live event where a portion of $SKING is burned as a symbol of the kingdom's strength and growth.

Virtual Spaces and Special AMAs – Chats, streaming, or discussions with team members and the community to strengthen the project's spirit.

Rewards for Loyal Subjects – Those who have shown long-term loyalty and support may receive special recognition (commemorative NFTs, exclusive Telegram tags, etc.).

The Community Oath – A symbolic moment where the community pledges loyalty to the SolKing realm and collectively decides on goals or initiatives for the following year.

Tokenomics

Token Name: SolKing

Symbol: SKING

Maximum Supply: 1,000,000,000 SKING

Distribution:

71%: Public distribution through public sale

9%: Developers

8%: Investors

5%: Marketing

3%: Innovation

2%: Merchandising

2%: Airdrops and giveaways

However, these percentages are under review to consider reducing the allocation for the team and investors before launch. This will promote greater decentralization and eliminate the possibility of a rug pull by the team—it will be impossible to execute since there won't be the means to do so! This adds another layer of trust from and for the community.

Conclusions

SolKing represents a new era for meme coins. With a strong community, a solid technological foundation, and a clear vision, we aim to increase SolKing's value and establish our token as one of the most recognized and respected cryptocurrencies.

Join us on this journey, and together, we will claim the throne!

From Meme to King!

Born, Grown, Enduring—This is SolKing.

Built on the Solana blockchain.
